Hello all,

Starting this morning ComEd is scheduled to start boring a new underground cable feed for OES & the BHC. Included is the map showing its starting point in the alley behind Casey's and coming down Jefferson street.

The entire line was supposed to be replaced a few weeks ago but it was decided to try to repair just the underground fault north of the track which didn't work. This entire line is old and to prevent any more underground faults the whole thing is being replaced at ComEd expense.

In the past we have lost power in Jefferson and the BHC, we have also seen the emergency lights in buildings flickering and this was a big part of the problem.

The work being done today should not effect buses, traffic, or our daily operations.

Bill

Mission: Educate students to be lifelong learners who are productive, responsible citizens.

Bill Nesemeier | Facilities Director

Community Unit School District #220 – Oregon, IL
