OPTION 2
Surfacing

Poured in Place

1-3/4" thick (Thicknesses are subject to a nominal variation) system with top surface in 50% color / 50% black speckled mix. Includes standard aromatic. Includes freight. Includes Trike Track graphics as shown on submitted drawing.

2,411 Sq. Ft. Poured-in-Place \$ 45,534

Notes:

- * 1-3/4" thick poured-in-place system meets 4' critical fall height.
- * Thicknesses quoted to meet industry standards for ASTM testing of 1000 HIC/ 200 Gmax.
- * This quote is for material and installation of the play surface only as described on the quote and does not include any ancillary work required such as sub base, security, drainage, removal of any existing surface, testing, etc. That would be done by others.
- * Poured-in-place system is IPEMA certified.
- * Union wages included.
- * Quote does not include security that is needed to protect the surfacing during curing time. Purchaser shall be responsible for security, as needed, to prevent vandalism and/or damage of any type to the surface during installation process, curing time, and after the installation is completed.
- * With Certain EPDM rubber colors, it is recommended that an aliphatic (non-yellowing) binder be considered, however this is an additional charge. Adding aliphatic binder will carry a 10-year warranty.
- * It is recommended that the following colors be used as accent colors only: Teal, Yellow, Purple and Primary Red. If one of the listed colors is selected for more than 25% of the top surface, additional charges may need to be added.
- * Due to the volatile urethane pricing in the industry, the price quoted is only valid 30 days from the day the quote was provided.
